

Upcoming Topic: Onsite Stormwater Management

Join us for the next installment in our series of solutions-oriented information sessions hosted by ECOSS and sponsored by the City of Seattle Office of Economic Development. The topic for this session is onsite stormwater management. The session will feature representatives from agencies and organizations that can help you determine cost effective strategies for managing stormwater runoff and preventing stormwater pollution.

Scheduled speakers include:

- ▶ **Ellen Stewart from Seattle Public Utilities** works with businesses on source control issues and the implementation of stormwater Best Management Practices.
- ▶ **Cynthia Hickey from King County** is a Senior Water Quality Engineer who works with businesses to address drainage and water quality issues to ensure compliance.
- ▶ **Mary Rose of the Network for Business Innovation and Sustainability (NBIS)** directs NBIS' Salmon-Safe Urban Initiative, which certifies Puget Sound area landowners for proactive stormwater and landscape management practices.
- ▶ **Danielle de Clercq of CleanScapes** manages the company's operations, facilities and environmental issues. She will share insights from a stormwater case study perspective.
- ▶ **ECOSS' Alex Anderson** will also give a brief presentation on general stormwater issues and their relevance to the Seattle business community.

This is a great opportunity to ask direct questions and get straight answers about any onsite stormwater issues you may have. Please note that we will not be covering any stormwater policy issues for this session. Instead, we will focus on specific, on-the-ground stormwater strategies for commercial properties.

We will meet from 7 a.m. to 8:30 a.m. at Herban Feast's fantastic space in SoDo. Coffee and pastries will be provided. There are only 30 spots available for this session so please RSVP at your earliest convenience by sending an email to aldan@ecoss.org.

When: Tuesday, October 13th, 7 a.m. to 8:30 a.m.
Where: Herban Feast, 3200 1st Ave S, 98134

We look forward to seeing you!
